e-VERIFILE Launches e-RAILSAFE CANADA

**FOR IMMEDIATE RELEASE:**

**ATLANTA- September 17, 2009** – Atlanta-based **e-VERIFILE.COM Inc**, is pleased to announce that it has launched **e-RAILSAFE Canada**--- the latest in the company's line of e-RAILSAFE branded services. The new service is based on the successful e-RAILSAFE Class 1 service which was instituted in 2005 by the 7 major railroads operating in the United States.

**e-RAILSAFE Canada** (ERS-Canada) was designed exclusively for the Canadian Railroad industry and enables managers to easily facilitate compliance awareness, and workplace credentialing for their Canadian-based employees and contractors. A feature that distinguishes the system from its US counterpart is the ability to conduct Canadian criminal background checks as well as those from the United States. Now railroad personnel who are either U.S. or Canadian citizens can be easily screened via the system.

"The original e-RAILSAFE program has been so successful in the US that it made perfect sense to expand this internationally," says Devon Wijesinghe, e-VERIFILE's Chief Strategy Officer. "With the largest Canadian railroads already being part of the e-RAILSAFE system in the United States, they asked us to come to their "hometown"," Wijesinghe added.

To use ERS-Canada, railroad operators and related enterprises simply subscribe to the service and login to create their own **Workplace Compliance Programs**. Once an account has been established, these organizations then require their personnel and/or contractors to become subscribers and then login to comply with the programs. Successful compliance with the programs determines eligibility to access select railroad facilities and jobsites in Canada or to receive associated credentials.

For more information on e-RAILSAFE CANADA, please contact **Courtney Young**, ERS-Canada Managing Client Consultant at: **770-859-9899**

### **ABOUT e-VERIFILE.COM INC.**

**e-VERIFILE.COM™** provides innovative solutions that streamline workforce, contractor and security management processes for a variety of organizations and industries worldwide.

e-VERIFILE.COM Inc. developed the e-RAILSAFE program in 2005, after it was selected by several U.S. and Canadian Class 1 Railroads to help augment safety and security at railroad facilities in the United States. Class 1 railroads are designated as the largest freight railroads, as classified by operating revenue.

Since it's launch, e-RAILSAFE has expanded to include **e-RAILSAFE ShortLine** ([ers-shortline.com](http://ers-shortline.com)) and **e-RAILSAFE Canada** ([e-railsafecanda.com](http://e-railsafecanda.com)).
